Phone: +91-7754930180 | Email: sarveshsingh54362@gmail.com| LinkedIn: https://linkedin.com/in/sarvesh-singh-091477303 | GitHub: https://github.com/sarveshsinghai | LeetCode: https://leetcode.com/mrsrv77 | Portfolio: https://sarveshsinghai.github.io/portfolio/

TECHNICAL SKILLS

Programming Languages: Python, Java, MS-Excel
Machine Learning: Pandas, NumPy, Matplotlib, PyTorch, Scikit-learn, NLP, OpenCV
Web Technologies: HTML, CSS, JavaScript, Django
Databases: SQL
Tools: Git, GitHub, VS Code, Jupyter Notebook
Core CS: DSA, OOPs, DBMS, OS, CN

WORK EXPERIENCE

Python with AI Intern | EWB Edutech Pvt Ltd | Virtual
- Successfully completed a one-month internship in Python with AI.
- Gained practical experience in Python programming, Pandas, and NumPy.
- Worked on an assigned real-world project using Python.
- Developed problem-solving, analytical thinking, and programming skills.

DMSRDE DRDO Nov2021 — Oct 2022 *Apprenticeship Kanpur,Onsite*
- Electronic Mechanic Apprenticeship with hands-on industrial experience at DRDO.
- Worked on spinning machines and furnace operations , contributing to equipment monitoring, maintenance, troubleshooting and safety compliance.

PROJECTS

Student Performance Analytics System | Python, Pandas, NumPy
- Developed a Python-based system to analyze student academic performance.
- Calculated total marks, subject-wise averages, grades, and pass/fail status.
- Identified top-performing students based on their academic results.
- Generated performance reports using Pandas and NumPy.
- Exported analyzed results into a CSV file.

Face Recognition Attendance System | Python, OpenCV, NumPy, Pandas, Pickle, CSV, Git, GitHub
- Developed an AI-based Face Recognition Attendance System using Python and OpenCV to automate attendance tracking.
- Implemented real-time face detection and recognition for accurate identification of registered users.
- Automated attendance recording by storing the user's name, date, and timestamp in CSV format.
- Designed modular components for face registration, model training, and attendance management to improve maintainability.

Student Score Prediction | Python, Pandas, NumPy, Matplotlib, Scikit-learn, Linear Regression
- Developed a machine learning model using Linear Regression to predict student scores based on study hours.
- Performed data preprocessing, train-test splitting, and model training using Scikit-learn.
- Visualized the relationship between study hours and scores using Matplotlib.
- Evaluated model performance using Root Mean Squared Error (RMSE) and generated predictions for new input data.

EDUCATION

B.Tech Computer Science & Engineering (Artificial Intelligence & Machine Learning) Pursuing

ITI
- Mechanic Diesel (NCVT) — 74% **(2019–2021)**
- Electronics Mechanic (SCVT) — 80% **(2017–2019)**

U.P. Board
- Higher Secondary (SKBIC) — 74% **(2017)**
- Secondary (SBSHSS) — 85% **(2015)**

CERTIFICATIONS

- Operating System Fundamentals - **NPTEL**
- O Level – **NIELIT**
- Course on Computer Concepts (CCC) – **NIELIT**
- Programming Fundamentals Using Python – **Infosys Springboard**
- Machine Learning – **United Global Infoservice Pvt. Ltd.**
- Python for Data Science – **United Global Infoservice Pvt. Ltd.**
- Programming Using Java – **Infosys Springboard**
